# What do we do?

---

- We analyze campus needs, interests and directions, and then tailor the software licensing program to meet those needs.
- We make available site licenses for many software titles, some of which extend licenses to our students, faculty and staff for home use.

# The Savings

---

- Based upon purchasing patterns under NC State's Adobe Contractual Licensing Program (CLP) and Microsoft Campus Agreements, the campus has saved almost \$500,000 in the past year when purchases are compared to standard academic pricing.

# The Savings (an example)

---

For example,

- Microsoft Office: Campus has spent \$125,751.92 on Microsoft Office through Campus Agreements in the past year, saving approximately \$239,454 if purchased through other academic channels.\*
- All Adobe Products: Campus has spent \$202,856.10 on Adobe products through the CLP during the past year, saving approximately \$240,640 if purchased through other academic channels.\*

\* If compared to retail pricing, the savings are much greater.
